2CEIT6PE7: ETHICAL HACKING
PRACTICAL LIST
AY 2023-2024

Practical-1: Virtual Lab Setup using VMWare workstation.

Install VMware

The following OSs are required to install:

1. Kali linux
2. Metasploitable 2
3. Metasploitable 3
4. Windows 10
5. Windows 7

Note: Set the Network adapter to the NAT network and enable the DHCP so, VMware automatically gives IP addresses to each machine. To enable DHCP to go to Virtual Network Editor with administrator privileges.

Metasploitable 3: Username: vagrant. Password: vagrant
